

Marquis Systems inc.

SECURITY CONSULTING ENGINEERS

COMPANY PROFILE:

Marquis Systems is an engineering consulting firm focused specifically on providing security system design solutions for commercial, institutional, healthcare and government buildings and campuses. We have a core group of engineers, project leaders and technical resources which insure that your system designs have the current technology that will provide cost effective solutions.

We have the experience, to provide you with complete system integration engineering, and also assist in the budgeting process for long range planning purposes and to help you and your general contractor manage the installation of the individual systems during construction or retro-fit.

Marquis Systems is constantly evaluating the products offered in the industry to stay abreast of technology and cost reduction solutions to conserve financial resources for our clients. Physical security is becoming ever increasingly important to agencies, corporations, municipalities, schools, hospitals and airports. In fact, it is unusual today to construct any building without some type of electronic security system in place.

We believe Marquis Systems is the best engineering company available to design the right security system to meet your needs and budget.

DESIGN CAPABILITIES:

The spectrum of *Marquis Systems'* design capabilities range from advanced wireless communications to the selection of the appropriate applicable biometric technology for your high end security needs. We work extensively with architects and corporate security teams to integrate the latest technologies for both their existing and new facilities. For large corporations and government agencies, we have the capability to design enterprise systems that will make use of proprietary networks to control security systems worldwide. The Marquis engineering team is proficient in the management and design of projects involving:

SECURITY:

- *Alarm Monitoring*
- *Access Control*
- *Digital or Analog CCTV*
- *Intercom / Radio Communication Systems*
- *Central Station Design*
- *Biometric Augmentation*
- *Security Software*
- *Remote Location Control*
- *Infant Security Systems*
- *IP Based Security System Solutions*

Positive identification using biometric readers.

MARQUIS SERVICES:

Marquis Systems is prepared to support all phases of a project from concept to commissioning. This includes but is not limited to:

- *Master Planning*
- *Budgets*
- *Technical Feasibility Studies*
- *Risk Assessment*
- *Systems Integration*
- *System Engineering*
- *Construction Drawings & Specifications*
- *Site Evaluations*
- *Construction Project Management*

A security operations center designed by MarquisSystems for a hi-tech silicon valley company.

OUR DESIGN APPROACH:

The rapid evolution of technology provides you, with a huge number of options. We strive to narrow that field of possibilities and present them to you in a coherent fashion. We evaluate and identify your true needs and specify solutions that meet them. We never recommend technology for technologies sake just to try to position you on the leading edge. It is our responsibility that the final results achieve your long-term objectives as cost effective as possible.

Marquis Systems considers your immediate and long-term requirements for efficiency, functionality, globalization and business continuity. We design systems that are smart, technologically flexible, modularly expandable and ultimately reliable. We work directly with you and your team to design command and communication centers that are tailored to your company, its projected growth and specialized operating environment.

Marquis Systems has been in business since 1996. It has been providing specialized management and design services to the construction industry for over 13 years. We have generated construction drawings and specifications for more than 450 projects. Some of our major projects have been for the following clients:

GOVERNMENT:

- DEA
- DOJ
- City of Las Vegas

HIGH TECH:

- E-Bay
- Novell
- Autodesk

PHARMACEUTICAL:

- Alza
- IMPAX Labs
- Boston Scientific

COMMERCIAL:

- TRW
- Applied Materials
- Dole World HQ

DATA CENTERS:

- Equinix
- Pacific Bell
- Wells Fargo

Hospitals:

- Kaiser Permanente
- CHW - St. Joseph
- Children's Hospital L.A.

Enterprise global security systems control and monitor facilities across many continents.
